

Coronavirus: Message to Falcon Customers

The pest management industry is referenced by The World Health Organization, The EPA, U.S. Department of Agriculture and The Centers for Disease Control and Prevention as essential to protecting the nation's public health.

<https://www.epa.gov/insect-repellents/list-pests-significant-public-health-importance>

Falcon Lawn and Pest's mission is to protect the health, safety, and property of our customers from the many pests in Florida.

We will not suspend services unless advised by the Centers for Disease Control and Prevention (CDC) or the local government.

- Falcon's services maintain a barrier between you and pests entering from the exterior of your home without the need to go inside.
- Now more than ever, it is necessary to maintain these services due to the increased time spent inside the home and for the protection of your food supplies.
- If you require services inside your home, Falcon can provide them by using the recommended CDC health precautions to protect you and our technicians.
- Our paperless service reports, statements and service agreements eliminate face to face contact. *(If you are not using our paperless process please contact us at info@falconpest.com or 1-800-532-5266)*

In addition to limiting in-person contact, Falcon has eliminated group meetings, is using recommended sanitizing health precautions in our offices and our employee vehicles are sanitized every day. All Falcon employees are required to follow the hygiene practices recommended by the CDC to protect both your safety and that of our technicians. We are carefully monitoring their health on a daily basis and require anyone feeling unwell to remain at home and to seek medical attention.
